

WHAT IS CLAIMED IS:

1. A system for bundling orders comprising;
a database;
said database comprising information relating to a production schedule and new ordered products;
said system compares said new ordered product to said scheduled products and determines whether said new orders and said scheduled products can be bundled.
2. The system of claim 1 wherein said production schedule is reordered after bundling said new orders.
3. The system of claim 1 wherein said system calculates price of said new orders based on bundling.
4. The system of claim 1 wherein said system calculates in real time cost savings bundling said orders.
5. The system of claim 1 wherein said system determines bundling of said orders based on greatest cost savings.
6. A method for bundling orders for same product or a similar product comprising;
inputting into a computer database a product schedule;

inputting into said computer database new orders for products;
matching said new orders with said product schedule.

7. The method of claim 6 further comprising;
rescheduling said product schedule.
8. The method of claim 6 further comprising;
calculating price of said new order based on the savings of bundling said new
orders to said scheduled product.
9. The method of claim 6 further comprising;
calculating in real time cost savings of bundling said orders.
10. The method of claim 6 further comprising
bundling said orders based on greatest cost savings.
